

Youthful design – at the forefront of technology!

The Semina semi-cassette awning is not only fashionably elegant,
it is thought through to the last detail.

weinor
THE AWNING
*... more than
sun protection*

*weinor Semina awning –
variable and modern!*

An awning for any patio: Being round and compact, the many sizes available in the Semina range give you lots of room to manoeuvre.

The harmonious impression created by the rounded Semina semi-cassette awning will grab your attention – as will its many clever technological details. Available in widths up to 6 m and a projection of up to 3.5 m, the Semina is ideal for a wide range of patio sizes.

Be creative with a wide range of colours and fabric patterns!

47 frame colours
at no extra cost
8 trendy conservatory colours (+5%)

Matching designs: wonderful fabrics

Combine the wide range of frame colours with over 140 exquisite fabric patterns from weinor's "moments" fabric collection. You could, for example, use the same colour as the house façade for the awning and its fabric.

weinor acrylic fabrics, with their high quality workmanship and tear-resistance, are noted for their exceptionally long lives. Special finishing processes also make them particularly UV resistant. Use of the latest nanotechnology gives weinor's fabrics exceptional dirt- and water-repellent properties.

weinor awnings with a big choice of colours

Choose from 47 standard frame colours, 8 scratch-resistant and robust trendy conservatory colours (5% surcharge) as well as another 200 special RAL colours for your awning.

Clever details

Rainwater drains away through an integrated gutter. The gap cover brush in the top section removes residual dirt when the fabric is rolled up.

The Semina is fitted with all our years of experience ...

... and is nicely rounded off.

As well as the wide choice of frame colours, the side fittings on your Semina are available in different colours. We invite you to combine them!

Well protected – thanks to its semicircular top (semi-cassette) and the specially designed semicircular front rail, the Semina's mechanism and fabric are well protected from the elements. The motor drive, fitted as standard, retracts the awning at the touch of a button.

Comfort with the remote control

You can operate the **WeiTronic Remoto** remote control to adjust shade, heating and light from your favourite chair. You can even adjust the light and heating.

*It's all in your hands:
clever accessories for your comfort*

The Light Bar Lux creates a pleasant atmosphere

With the Light Bar Lux, you can always put yourself and your guests in the right light. The light bar is easy to fit to an outside wall. It can be operated by hand or remote control. You can use the light to create a pleasant atmosphere on your patio.

The patio heating makes the season longer

The heating system **Tempura** makes the patio a very pleasant place to be, even in cooler weather. The radiated heat covers a relatively large area. The housing can be adjusted upwards and downwards as required.

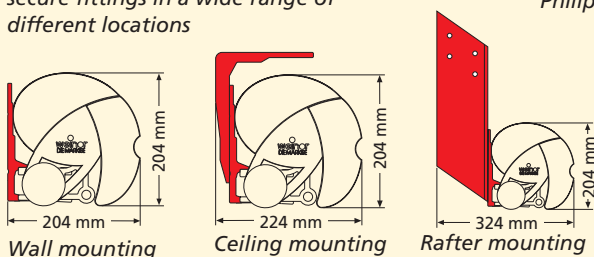

Reacting to all weathers: WeiTronic weather sensors

A wide range of **WeiTronic** weather sensors is available for motor-driven awnings: from a basic sun sensor to a sun and wind sensor or a sun, wind and rain sensor,

Depending on the version, they open the awning automatically in the sun and retract it in the wind and rain. That way they provide protection and safety, even when you are not at home.

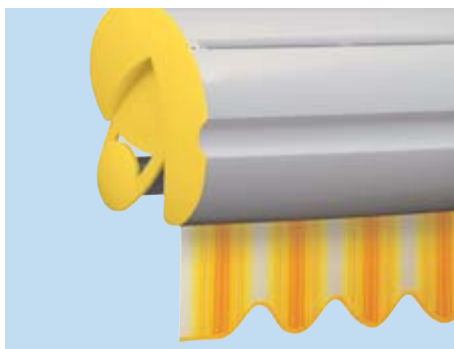

CLICKFIT With an exceptionally long service life of 5,000 hours, you will find these quality Philips heating tubes very convincing. Replacing the tubes is quick and simple with the Philips Click-fit-System.

Perfect and simple mounting with secure fittings in a wide range of different locations

Optional flexible valance

The optional valance can be removed very quickly and put away in a safe place for the winter.

We offer the very highest quality

weinor puts a lot of emphasis on quality, from the design and materials to workmanship, mounting and service, so you can enjoy your Semina for a long time.

Proven top quality

Awning technology for the highest demands

Patented technology for maximum safety

The patented folding arms with wind lock safety device hold the awning in place and prevent it from being lifted by surging winds. During retraction, the folding arms disappear completely into the casing. Arm stops prevent the arms from hitting the rail.

Made in Germany – certified top weinor quality

Quality is our first commandment. That is why most of our products are certified by the German TÜV. weinor invests a lot in the development of new products. The result: innovative products made in Germany.

Longevity

We don't cut corners on the big or small parts: All our small parts such as screws, nuts and bolts are of stainless steel so they will last especially long. All other parts are powder coated in an elaborate process. This makes them impact and scratch resistant.

Non-wearing

Even after being opened and closed 40,000 times, the round steel linking chain in the centre joint of the awning shows no signs of wear. We **guarantee it for 10 years**.

Taking a hammering

While cast parts can shatter, weinor's forged materials can even withstand hammering.

Awning with infrared radiator and/or loudspeaker	000001403442

Important Informations:

For textile sun protection: Creases can form in the fabric and when folding the awning cloth. That can lead to the areas of the fold appearing darker when seen against the light, particularly with light colours. Folds in the fabric in the areas of the seam, border and panels can be caused by multiple layers of fabric and different diameters of rolled up fabric. The stresses in the fabric caused by this can lead to rippling (e.g. waffle or fish-bone shapes). This is normal to differing degrees with nearly all awning fabrics. Creases and folds in the fabric do not reduce the awning's value or its suitability for its purpose. Awnings and conservatory blinds are for

protection from the sun and should be rolled up in rain and strong winds. Wet fabric creases more easily and as far as possible should only be retracted after drying out (please take care in strong winds and avoid the formation of puddles). Depending on the colour of the ordered frame we supply all small parts as well as crank handles and drives for units with crank mechanisms in black (similar to RAL 9005), white (similar to RAL 9016) or grey (similar to weinor 7319).

For patio roof, Glasoase®, conservatory: Let a qualified conservatory builder explain the causes of condensation and how it can be avoided at the planning stage.
