

weinor Topas open awning

**NEW!** Now also with motorised Valance Plus

## Great quality on a budget

The Topas open awning is a work of art, which everyone can afford – it scores highly *with many functions at a truly fantastic price*

[www.weinor.com](http://www.weinor.com)

**weinor**  
THE AWNING  
*more than  
sun protection*

*Transform your patio and add a welcoming ambience. With an awning and some accessories you can create your patio dream.*

## *weinor Topas awnings – excellent value for money*

Whether with or without a hood: the Topas will win you over with great quality and clever details.

### **Quality need not be expensive**

The small, compact entry level weinor model, the **Topas** open awning with or without a hood offers all of the high quality expected of weinor – at an attractive price. Added to this we offer modern design and a wide choice of fabrics.

*Choose your colour and fabric individually for your style and image. A wide range of different colours and fabric patterns are available for you.*

**Matching designs:  
wonderful fabrics**

Combine the wide range of frame colours with over 140 exquisite fabric patterns from weinor's "moments" fabric collection. You could, for example, use the same colour as the house façade for the awning and its fabric.

**weinor awnings with  
a big choice of colours**

Choose from 47 standard frame colours, 8 scratch-resistant and robust trendy conservatory colours (5% surcharge) as well as another 200 special RAL colours for your awning.

*weinor acrylic fabrics, with their high quality workmanship and tear-resistance, are noted for their exceptionally long lives. Special finishing processes also make them particularly UV resistant. Use of the latest nanotechnology gives weinor's fabrics exceptional dirt- and water-repellent properties.*

**Topas MiniMax open awning which is deeper than it is wide**

Shading narrow balconies is no problem with the **Topas MiniMax**.

## *Perfectly constructed for long narrow patios*

– the Topas MiniMax provides suitable shade even for unusual patio locations

*You can choose on which side the lower mounted arm is on.*

The **Topas MiniMax** will convince you with its dimensions. With more projection than width even narrow patios can be shaded without trouble. Supports mounted at differing heights ensure a particularly stable design – this enables a narrow width of only 235 cm with a projection of 400 cm.

## Comfort with the remote control

You can operate the **WeiTronic Remoto** remote control to adjust shade, heating and light from your favourite chair. You can even adjust the light and heating.

*It's all in your hands:  
clever accessories for your comfort*

**NEW!** Now also with motorised Valance Plus

### Reacting to all weathers: WeiTronic weather sensors

The **WeiTronic** weather sensors are available as just a sun sensor, a sun and wind sensor, or a sun, wind and rain sensor. Depending on the version, they automatically open the awning in the sun and retract it in the wind and rain. That way, they provide protection and safety, even when you are not at home.

*Perfect and simple fitting, even in a wide range of different locations with modern two-point mounting.*

### The patio heating makes the season longer

The heating system **Tempura** makes the patio a very pleasant place to be, even in cooler weather. The radiated heat covers a relatively large area. The housing can be adjusted upwards and downwards as required.

**CLIC-FIT** *With an exceptionally long service life of 5,000 hours, you will find these quality Philips heating tubes very convincing. Replacing the tubes is quick and simple with the Philips Click-fit-System.*

### Vertical sun and retraction protection

The **Valance Plus** on the **Topas** is now also available with a motor and an all-in-one **WeiTronic** set. In addition to offering infinitely adjustable vertical sun protection, the system comes with a special retraction protection feature which prevents things getting swept away – because the main awning is only retracted once the **Valance Plus** has been retracted. The front rail bar is drawn deep inside the front rail for a clear finish. In the process, the patented floating bearing prevents the fabric roller from drooping, and wrinkles and creases from forming.

## The flexible valance

The valance can be removed very quickly and put away in a safe place for the winter.

Technical details	Topas without hood	Topas with hood	Topas MiniMax

We offer the very highest quality

Weinor puts a lot of emphasis on quality, from the design and materials to workmanship, mounting and service, so you can enjoy your **Topas** for a long time.

# Proven top quality

Awning technology for the highest demands

## Made in Germany – certified top weinor quality

Quality is our first commandment. That is why most of our products are certified by the German TÜV. Weinor invests a lot in the development of new products. The result: innovative products made in Germany.

### Taking a hammering

While cast parts can shatter, Weinor's forged materials can even withstand hammering.

### Longevity

We don't cut corners on the big or small parts: All our small parts such as screws, nuts and bolts are of stainless steel so they will last especially long. All other parts are powder coated in an elaborate process. This makes them impact and scratch resistant.

### Non-wearing

Even after being opened and closed many thousands of times the round steel linking chain in the centre joint of the awning shows no signs of wear. We guarantee it for 10 years.

## The best advice from your experts

The best way to get an idea of how your patio will look with the **Topas** is to get advice from an expert. Our competent dealers will be happy to advise you, giving you sound advice and assistance on all technical and aesthetic matters.

#### Important Informations:

**For textile sun protection:** Creases can form in the fabric and when folding the awning cloth. That can lead to the areas of the fold appearing darker when seen against the light, particularly with light colours. Folds in the fabric in the areas of the seam, border and panels can be caused by multiple layers of fabric and different diameters of rolled up fabric. The stresses in the fabric caused by this can lead to rippling (e.g. waffle or fish-bone shapes). This is normal to differing degrees with nearly all awning fabrics. Creases and folds in the fabric do not reduce the awning's value or its suitability for its purpose. Awnings and conservatory blinds are for

protection from the sun and should be rolled up in rain and strong winds. Wet fabric creases more easily and as far as possible should only be retracted after drying out (please take care in strong winds and avoid the formation of puddles). Depending on the colour of the ordered frame we supply all small parts as well as crank handles and drives for units with crank mechanisms in black (similar to RAL 9005), white (similar to RAL 9016) or grey (similar to weinor 7319).

**For patio roof, Glasoase®, conservatory:** Let a qualified conservatory builder explain the causes of condensation and how it can be avoided at the planning stage.
