

The WeiTop Vivienda conservatory

*Your conservatory
filled with light and life*

Enjoy the atmosphere of a weinor conservatory –
well-sheltered, but still close to nature

www.weinor.com

weinor
THE AWNING
*more than
sun protection*

Your new room for every time of the year

Enjoy your new place of well-being
and a view of your garden all year round!

A weinor conservatory provides a seamless transition between indoors and outdoors. Relax in your new verdant room or use the room to socialise with friends and family. An intelligently coordinated system of components turns your conservatory dream into a reality. As everything you need is available from weinor, it all matches perfectly – the shape, the colour and the technology.

“The new room, the mass of light, the wonderful atmosphere – this is one investment that has definitely paid off ...!”

No matter what the weather: enjoy nature in your conservatory

A conservatory allows you to enjoy nature at any time of year. You can even have the benefit of your garden in winter while snuggled up

warm and cosy on the sofa. Flexible side screens also allow you to open your conservatory to let in the summer.

Intelligent accessories – always a safe bet with weinor

To ensure that you don't feel the effects of the sun too much, weinor has developed perfectly coordinated conservatory awnings that keep you pleasantly cool. The intelligent accessories provide comfort and relaxation – from skylights and roof vents to lighting, weather sensors and remote controls. Accomplish your conservatory dream just the way you imagined it – with weinor's proven conservatory system.

**Create moods
with beautiful light**

At weinor, atmospheric lighting is directly incorporated into the concept. The dimmable halogen lamps allow you to conjure up attractive lighting effects with no visible wires whatsoever.

*weinor conservatories - a multitude
of colours and shapes*

Whether a new or old building – a conservatory is an outstanding architectural feature.

Adding a conservatory is like adding another room on to your house. This increases the value of our property significantly. Exactly what your conservatory should look like is all up to you.

**Exclusively from weinor:
a massive choice of colours**

Choose from 47 standard frame colours, 8 scratch-resistant and robust trendy conservatory colours (5% surcharge) as well as another 200 special RAL colours

Choose from a range of different roof shapes

The right solution for every kind of building

Characteristic shapes – tailored to your house

The **WeiTop Vivienda** conservatory adapts flexibly to the shape and aesthetics of your house – even if it has protruding walls or alcoves. Choose your personal favourite from a wide variety of construction types. We will be happy to advise you in detail and help you to decide which roof shape is the best solution for your house.

A wide choice of wonderful frame colours – choose one to your taste

weinor offers a wide choice of colours for your patio roof to suit your house and furnishings. Combine them to your taste, and make your house a colourful place. Our quality control system and a high degree of flexibility through our own powder coating cabinet assure durability and the very highest aesthetic looks.

The 8 trendy conservatory colours (see above) with high quality metallic looks have a scratch-resistant and robust surface and are particularly suitable for patio roofs.

Pent roof with hip

Pent roof with hip and chamfered at the front

Pent roof corner section

Gabled roof

Other individual shapes available on request

Slim aluminium sections are used to increase the amount of glass used and therefore provide maximum transparency. ►

A wide range of windows and doors – for you to combine however you like! ▼

Slide, fold, tilt – highly individual side glass elements

Choose what best meets your needs and create a smooth transition to nature!

weinor offers a large number of side glass elements to match your **WeiTop Vivienda roof**: fixed glazing for numerous types of construction, as well as flexible window and door solutions. You decide whether you want to slide, turn, fold or tilt, how much shelter you require, and how much open space you would like.

Made-to-measure for wonderful views

Cross-sectional views (l to r):

- Window w70-w with leaf
- Sliding door w45-w
- Slide-and-tilt door w70-w
- Accordion partition w60-w

Flowing transition to nature

with side glass sections you can make disappear

A choice of glass side sections to match your personal requirements

*Fixed glazing/
window/door
(w70-w)*

Side glazing – matched perfectly

Glass doors and windows of your choice, or fixed glass sections – it can all be fitted easily because the sections are all matched to each other.

*Sliding door
(w45-w)*

To open large fronts

One turn of the hand and your sliding doors are open. The benefit of this feature is that you can fit your conservatory out with large glass surfaces – and open virtually the entire front as soon it turns warm.

*Lift-and-slide
door
(w45-w)*

Heavy doors – easily opened

With the lift-and slide door system, you can also move heavy glass fronts with little effort. Simply lift and slide to the side.

*Parallel tilt and
slide door
(w70-w)*

If there is not much space: they can be tilted

The space saving tilt and slide doors can be moved to the side easily and comfortably from the tilting position. When open, you have a clear view of the gar-

den, when tilted they provide good ventilation.

*Folding
partition
(w60-w)*

To open extra-large fronts

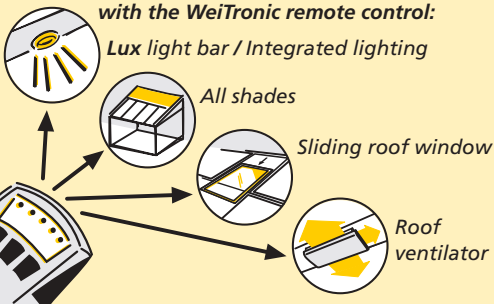

Accordion partitions are best installed where you want to create a connecting passage with a large opening. As the partitions slide completely sideways, you can open up an entire side of your conservatory. By applying the concertina principle, you can therefore make entire glass fronts disappear instantly to create the ultimate sense of the outdoors.

The perfect sun protection

In the blazing sun, conservatories become extremely hot. This is especially true if your house faces to the south or the west. For this reason, weinor offers a broad selection of intelligent shading solutions – with a look and technology perfectly tailored to your conservatory. weinor awnings are available in any form and function: for flat or pent roofs, with overhang or flush-mounted.

All these components can be conveniently controlled with the WeiTronic remote control:

All from one place – versatile functions combined perfectly

Maximum comfort – from shades to lighting and pre-programmed remote control ...

If you want to relax in your favourite chair under the patio roof, you need comfort. Intelligent accessories by weinor provide pleasant shade, atmospheric lighting and comfortable warmth.

The pre-programmed **WeiTronic Remoto** remote control allows you to operate your equipment conveniently from your lounge. As all the components come from one place, they fit together harmoniously.

To match the design: wonderful fabrics

Combine the wide range of frame colours with over 140 exquisite fabric patterns from weinor's "moments" fabric collection. You could, for example, use the same colour as the house façade for the awning and its fabric.

Pleasantly fresh conservatory climate
through matching shading and ventilation

reddot design award
winner 2008

Shades to provide privacy and protection from glare

The award-winning **VertiTex awning** (red dot design award 2008) and the **Aruba** window awning are two products that offer protection from both the sun and prying looks. As everything you need is available from weinor, both awnings are the perfect match for your **Vivienda** system in terms of their shape, colour and function.

Please see also our separate shade brochure!

A roof vent always provides a good climate

The constant supply of fresh air plays a vital role in creating a pleasant climate within your conservatory. weinor roof vents provide the right ventilation. Given their minimal construction depth, they are inconspicuous and virtually noiseless. They can be easily operated by remote control.

Quick and convenient ventilation – the sliding skylight

Reduces the accumulation of heat or stale air in the conservatory quickly, easily and conveniently and provides for ample ventilation. The **WeiTop DS** sliding skylight can be conveniently operated using the **WeiTronic** remote control device. Thanks to its excellent sliding mechanism, the skylight is especially quiet when opening and closing.

WeiTronic weather sensors ensure that your shades automatically open in sunshine and retract in gusty winds or rain.

weinor acrylic fabrics, with their high quality workmanship and tear-resistance, are noted for their exceptionally long lives. Special finishing processes also make them particularly UV resistant. Thanks to the latest nanotechnology, weinor's fabrics have exceptional dirt- and water resistant properties.

Low heating costs

weinor conservatories have especially good heat insulation. This is backed up by the exceptional values which have been determined by recognised testing, monitoring and certification centres. Good insulation always converts into lower running costs. This means that you benefit threefold: your conservatory remains cosily warm; you save on heating bills; and you also feel good about the environment.

** Thermal transmittance of roof structure Uf 1.7 (Vivienda, with additional insulation) and Uf 2.6 (Vivienda standard), IFT Rosenheim 2005.*

We offer the very highest quality

weinor puts a lot of emphasis on quality, from the design and materials to workmanship, mounting and service, so you can enjoy your **Vivienda** for a long time.

Top quality – the highest demands

weinor technology and service give you more

Sturdy design

The sophisticated design of weinor patio roofs provides maximum safety and longevity. A renowned engineering firm* has put the statics through their paces. Particular attention was paid to the stresses caused by the weather, such as loads placed on them by wind and snow. All components are produced industrially as series products. That way a patio roof from weinor provides the safety of a standardised quality product.

*Grobeck GmbH, Cologne 2005

“Made in Germany” quality

Our own powder coating

Since weinor is the only manufacturer to offer all the components from one place, all components are given the same powder coating. This ensures absolute colour accuracy and an identical level of shine.

Longevity

We don't cut corners on the big or small parts: All our small parts such as screws, nuts and bolts are of stainless steel so they will last especially long. All other parts are powder coated in an elaborate process. This makes them impact and scratch resistant.

Good advice from the experts

Installation of a patio roof requires competent partners with an open ear for your needs. Your weinor dealer will be happy to answer all your questions! weinor patio roofs are built to meet your needs exactly.

Perfect planning using state of the art technology

By using our **WeiCad** bespoke design software tool, we can visualise how the product will look when fully installed. This makes it much easier for all your questions to be answered, and also for your decision to be made.

No matter what you want to use your patio for, weinor has the right product for you – awning, patio roof, Glasoase® and conservatory

As an experienced specialist, your weinor dealer will help you throughout the process, from planning to completion. They will help make your patio dreams come true and will support you with advice and help. That way you stay on the safe side at all times.

Important Informations:

For textile sun protection: Creases can form in the fabric and when folding the awning cloth. That can lead to the areas of the fold appearing darker when seen against the light, particularly with light colours. Folds in the fabric in the areas of the seam, border and panels can be caused by multiple layers of fabric and different diameters of rolled up fabric. The stresses in the fabric caused by this can lead to rippling (e.g. waffle or fish-bone shapes). This is normal to differing degrees with nearly all awning fabrics. Creases and folds in the fabric do not reduce the awning's value or its suitability for its purpose. Awnings and conservatory blinds are for

protection from the sun and should be rolled up in rain and strong winds. Wet fabric creases more easily and as far as possible should only be retracted after drying out (please take care in strong winds and avoid the formation of puddles). Depending on the colour of the ordered frame we supply all small parts as well as crank handles and drives for units with crank mechanisms in black (similar to RAL 9005), white (similar to RAL 9016) or grey (similar to weinor 7319).

For patio roof, Glasoase®, conservatory: Let a qualified conservatory builder explain the causes of condensation and how it can be avoided at the planning stage.
