weinor
THE AWNING
*... more than
sun protection*

Unmistakable – the right coloured awning for every house

Ultra-modern powder-coating plants make it possible: nowadays weinor awnings and patio coverings can be colour-matched to your walls, windows, roof or patio furniture. We have 47 silk lustre shades of colour at no extra cost, and which can be supplied without delay. In addition, there are 8 metallic and textured colours available as trendy conservatory colours for a small extra charge.

The powder coating also protects against corrosion, is impact and scratch resistant, and it promotes a long service life.

Details of the wide range of weinor colours

- Individualistic because production is to order
- Coating in our own plants enables us to ensure reliable delivery
- Wide range of colours – paint in 55 standard powdered colours are always in stock
- No variations in shade – because they are always coated to order at the same time, all parts of a sun protection unit or similar are given exactly the same coating
- Chrome-free pre-treatment – every single part goes through various baths, such as acid degreasing, fresh water rinsing, rinsing with completely desalinated water, chrome-free passivation
- Electrostatic neutralisation – the individual components are electrostatically neutralised by chemical keying
- Powder coating – the pre-treated parts are dried in a contact moisture dryer and immediately powder-coated automatically
- Manual check – manual examiners check that the automatic pistols have sprayed every component properly, and if necessary they are touched up
- Ecologically friendly and economical – excess spray powder is fed back through pipes and re-used on the next order for the same colour
- Perfection by baking – the fresh powder coating must be baked on for 35 minutes at a temperature of 200°. The powdered silk lustre painted components cool down in the cooling zone before going directly to assembly and so to completion of the finished product
- Two-coloured versions – some models of awning are available in two colours. There are usually 6 standard colours to choose between for the head and front rail end caps

The right frame colour or conservatory colour for every house

Houses are like the people who live in them: individual

That is why weinor is now offering such a wide choice of frame colours. This means you can choose your awning or patio covering to be a perfect match for the façade, the windows or even your garden furniture. That will create a feeling of harmony right round the house and garden.

Whether you prefer fresh, exciting spring colours or comfortable, homely autumn colours, sorted by season, you will find the weinor range has lots of magnificent colours to suit every taste and type of house.

For technical reasons the colours may appear slightly different in print.

i Surcharge for trendy conservatory colours +5%, other RAL colours +10%, other fine structure colours +15% (all on the basic cost).

weinor supplies coloured crank handles. In the case of RAL 9016 traffic white and all other colours, the crank handles are supplied in jet black (RAL 9005).

Depending on the frame colour ordered, we supply all small parts, crank handles and gears for units with a crank mechanism in black (similar to RAL 9005), white (similar to RAL 9016) or grey (similar to weinor 7319).

Since introduction of the ban on heavy metal additives in powder coatings, despite the paint manufacturers' best efforts it is not always possible to guarantee stability of the shade of colour; bleaching, especially of the colour Blazing red (RAL 3000) cannot be ruled out.

47 frame colours in silk lustre façade quality

Monocolour *Opal Design Lux* with *Tempura* in the same colour (awning and *Tempura* in RAL 1023 traffic yellow, fabric pattern No. 4-202)

47 standard RAL colours

All 47 standard RAL colours are powder coated in façade quality, impact and scratch resistant in silk lustre.

Two colour awnings

The awnings can be made visually even more interesting by using two colours.

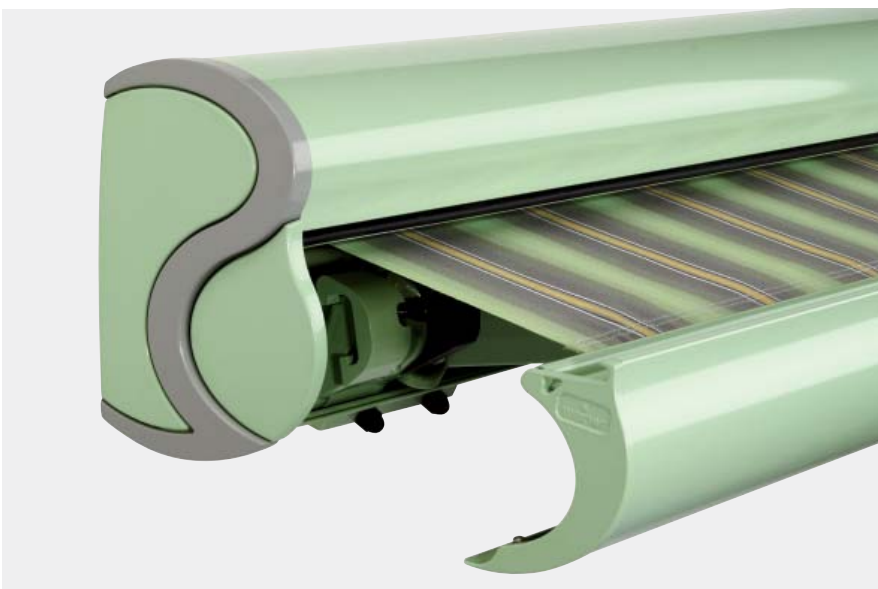

Small parts in contrasting colours

Most weinor awnings are available with small parts such as trims or headplates in contrasting colours. There are 6 colours available. RAL 9016 traffic white, RAL 9006 white aluminium, RAL 5017 traffic blue, RAL 1003 signal yellow, RAL 6005 moss green and weinor 7319 weinor grey.

8 trendy conservatory colours with self-cleaning effect

Modern architecture needs modern colours. With their finely structured metallic or iron look, the trendy conservatory colours in the weinor colour collection fit the bill. These coatings are highly scratch resistant, hard wearing and suitable for conservatory awnings. Their molecular structure gives them a self-cleaning effect. Water on the surface forms into droplets and so it can carry dirt away with it.

Two colour *Laplana* (casing in RAL 6019 trim in weinor 7319 weinor grey, fabric pattern No. 4-226)

Option for Special RAL colours

- Besides the standard weinor colours there are more than 150 other special RAL colours available for an additional charge.
